

T2 Instructions

This Clearomizer holds 2.4ml of liquid and is transparent so you can see how much e-liquid is left.

The T2 has changeable coil heads which means rather than purchasing an entire new unit when the atomizer dies you can save money by simply purchasing the Changeable Coil Head. **T2 clearomizers may have a male or female thread on the vapor coil, always check before ordering replacements.**

NOTE:

Please be sure to check and tighten the coil when filling/refilling the clearomizer. This will ensure that no leaking will occur.

How To Refill

1. Unscrew and remove the mouthpiece.
2. Check to make sure the Changeable Coil head (Atomizer Head) is tighten.
3. Fill the T2 Clearomizer 2ml to 2.4ml of e-liquid.

NOTE: Avoid filling the center tube with e-liquid. That tube is for airflow.

4. Screw the mouthpiece back on to clearomizer.
5. Allow 1-2 minutes for the E-Juice to feed into the coil before you start to vaping.
6. Screw onto your eGo compatible battery and start vaping.

Resistance: 2.4 ohm

Length: 73mm

Diameter: 15mm
